Comments: My wife and I live here in Big Park or otherwise known as Village of Oak Creek. We strongly object to the proposed overhead powerline. We have two reasons. First, it's an eye sore. We paid a premium price for our property in December 2017. We bought here specifically because of the views. With the installation of an ugly overhead line, you will effectively damage our property value and the reason we bought here. Second, fire danger. I just need say Paradise California to say it all. You are opening your selves, APS and the other authorities to huge liability and image damage. Your image has value and failing to consider the needs of the locals only harms an already bad image. Most of the people who live here are seniors. My wife and I are both 75. I'm seriously disabled. Running from a fire is not an option for me. I can walk, but only slowly and with canes. Image if someone like your father or mother were living here and were caught in a wild fire? Not an inviting idea. We oppose the overhead line.
