First name: Agatha

Last name: Nolan

Organization:

Title:

Comments: The current plan must be updated, it would be irresponsible to stick with a 30-year old plan to manage anything - especially not our beautiful, sacred local forests. Of the options presented, I believe Alternative B provides the best balance of preservation and wildfire protection. I also passionately advocate that regardless of the option ultimately agreed upon, it's critical to include Tribal Representation in the planning and ongoing monitoring / management. Our indigenous neighbors have lived with the land since time immortal, and the damage we have caused to our environment in the past decade requires our local government policy makers and land managers to seek Tribal council for how to shift our perspective and practices to better live in balance with the land.

Sincerely,

A Nolan

Seattle, WA
