Comments: I strongly oppose above ground powerlines when the burial of powerlines can be done. It does not make sense to ruin this red rock country with the addition of above ground powerlines. This is not a large metropolitan city. The Village of Oakcreek Sedona is one of mother nature's most beautiful areas to live and for people from all over the world to visit. The recent fires in LA have me concerned as a first-time homeowner to lose everything I've worked for caused from above ground power lines. Recent bills passed to protect APS from liability of a fire caused by their power lines is unacceptable and frightening. Please do the right action to listen to the constituents and taxpayers who actually live here and bury the powerlines.
