Title:

Comments: I was an original objector to the APS power line project. I believe this line should be buried. I lived in San Diego in 2007. I lost my home in the Witch Creek fire in October of 2007...total loss. That fire was caused by SDG&E powerlines that were above ground. I've seen first hand what a fire like that can do to a community. It destroys it...

I live in Las Piedras, the neighborhood that the lines will go directly through. We have a line now and it's ugly... the new lines will be worse. The line runs through a wash... the perfect place to put them underground.

There are a number of things that have changed since this new line was proposed. They have been detailed in numerous letters submitted recently. Please listen to the objections.

I ask that you simply reconsider the position to install this line above ground. The Village of Oak Creek's safety is at stake.

Thank you for your time.
