Comments: I fully support the Northwest Forest Plan and do not agree with any attempts to lessen its protection of my publicly owned forests. Old growth forests are incredibly valuable resources and should not be considered open for any sort of logging or development. The Northwest Forest Plan should not be amended in anyway that lessens those protections. The science shows that forests are important to fight against climate change, and hold incredibly high amounts of biodiversity. I will never support an administration that attempts to reduce existing protections for forests.
