Title:
Comments: As a homeowner, on the north side of the proposed project, I would like to provide these comments.

- I appreciate the expertise provided by the FS staff.
- I understand the values of making efforts to lessen unwanted fires, to protect watersheds, to open spaces for large animal grazing, etc.
- We built our place here over 30 years ago because we love the beauty of the area and wish to keep it natural for ourselves, neighbors and guests, and to maintain our property value.
- We have seen the desecration of some of the past thinning practices (See the travesty along Rusty J Lane) and are very concerned that our area will be left a total eyesore as that was.
- So while we support expertly planned thinning and fires, we ask that major efforts be made to leave the area beautiful and natural looking.

Thank you for your work to make our lands safer and better for wildlife and humans.
