Comments: I have had the pleasure of visiting Oregon once. It was one of the most beautiful places I have ever been. My friends and I took the trip to hike, sight see, and explore your incredible state. I am dreaming of the day I can take my kids to explore the wonders of Oregon. I truly hope your state and all it has to offer is not destroyed by logging. I understand the need for management but plain, chaotic destruction, is not in anyone's best interests. Your forests protect and preserve the whole planet. Our existence is carried by your beautiful forests. Please, do not for a flash in the pan cash grab destroy everything we have. Protect your lands. Protect our planet. Protect wildlife.

Thank you so much for your consideration.
