Comments: I am concerned that the Forest Service's proposed amendment to the Plan weakens protections for our region's forests, clean water, and wildlife habitat. If enacted, these changes would double or even triple logging levels across our public forests, open mature and old-growth trees to chainsaws, and sideline the protections that communities, wildlife, and ecosystems depend on.

I support some elements of the amendment that includes a beneficial fire approach and support of Indigenous cultural burning and co-stewardship agreements. The Forest Service should retain all of the Tribal inclusion plan components that are in Alternative B, but uncouple them from the forest management components that increase the age of trees and forests that can be logged.

Preserving biodiversity and connected wildlife habitat across the region should be a core principle of this forest plan amendment. This includes not only threatened species, but others that have been impacted by the loss and fragmentation of their habitat, and those awaiting state and/or federal Endangered Species Act listing decisions.
