Title:

Comments: Of all the proposed alternatives to the Northwest Forest Plan, Alternative A, the no change option is the best for protecting intact forest, old growth trees, habitat for threatened native species and climate stability. This was the original goal of the Plan. We need to include input using hative people's knowledge, but we don't need to cut more and protect less in order to do that. Please keep the Northwest Forest Plan as it is and take no action to make any of the proposed changes.
