First name: Sandra

Last name: Couch

Organization:

Title:

Comments: I support all public lands, open lands, refuges, parks, green space for our wildlife and nature to survive without human interference.

No roads, no hiking trails, no recreation, no tourism, no camping, no hunting, no trapping, no drilling, no fracking, nothing is to be done to change any of these lands for the benefit of humans.

Only changes to the lands are for the purpose to increase wildlife and nature habitats, decrease climate change, keep air/water/land clean from toxins.
