Comments: The Trump administration doesn't appear interested in public comment, but I hope the Forest Service listens. I strongly oppose the proposed amendments to the Northwest Forest Plan adopted in 1994. The amendment would vastly increase clearcutting, remove protections for mature and old growth forests, and drastically neglect our duty to protect imperiled species and local wildlife. The proposed amendment fails to meaningfully address climate change and would likely increase the frequency and severity of wildfires in our region in coming decades. It would basically threaten what is most cherished about Oregon - our forests and wildlife. Please don't let these destructive forces proceed.
