Title:

Comments: PLEASE DO NOT send our country's hard-fought efforts regarding environmental protection and the health of our forests that are home to endangered species. We must continue to protect our forests and the animals and plants that live there. Future generations deserve to enjoy our natural environment as much as we do today. Think of your own kids and grandkids, if the threat to plants and animals isn't enough to motivate you to act on this issue.

Thank you for your consideration.
