Comments: Thank you for this opportunity to comment on our public lands. Our beautiful national forest is a public treasure that protects our water and air and animals and provides a sanctuary for all of our people. Land to hike, camp on, and be restored by. It also sequesters carbon, so is very important to mitigate the affects of the climate crisis we are in. These lands must be protected. No old growth should be cut. Thank you so much for protecting our public teasure.
