Comments: I totally support the expansion of Tribal sovereignty on forest lands. However, the remainder if the DEIS is unsupportable. Our forests are essential to saving a livable planet for life as we know it. Intact old growth and second growth forests have to be preserved to draw down carbon and generate breathable air.

Thinning forests is commercial logging in disguise. Thinning increases wildfire risk by opening up the canopy and drying the surface.

Please leave the Northwest Forest Plan as it currently exists. Please do not amend it.
