Comments: I urge you to reject opening up of 800,000 acres of forest to logging. Please protect all remaining mature and old-growth moist forests in the Plan area to preserve ecosystems, save more carbon-storing trees, and improve fire resilience.

I support modifying and selecting Alternative C to better protect ecosystems, increase carbon storage, and meaningfully incorporate Tribes into forest management. While Alternative C is more protective of ecosystem function than the Proposed Action, it fails to incorporate the tribal involvement provisions contained in the Proposed Action and should be modified to include the same robust commitments to Tribal stewardship contained in the other action alternatives. Alternative C should also be modified to prohibit post-fire salvage logging, which harms an ecosystem's regeneration processes, pollutes our water, removes important habitat features, and reduces carbon storage.
