Title:
Comments: I believe the area should be open to any logging interests that may be able to reclaim any of the salvageable logs. Also any further cleanup that can be done to keep the area safe from any further Wildfires. This area is near to me and could possibly harbor a fire that could spread to my area so I have a personal interest in this as well as being interested in seeing our resources used rather than go up in flames to pollute the atmosphere. Thank you for being able to comment on this.
