Title:

Comments: Forest Service:

We must save our public land Climate Forests from the proposed clearcutting.

These forests are of global significance in the battle against climate change. It's our responsibility to protect these tremendous carbon sequestration machines, this canopy of titans, that are on our own OREGON public land.

THESE ARE OUR TREES !

Billions of people in the world are depending on us to do our part and keep them standing for their sake, for the sake of all the world's people.

NOW IS THE TIME !!!!!!!
