Comments: Re; Northwest Forest Plan Amendment

I am a native of the Pacific Northwest and have personal experience of the forests that are in scope for this plan.

I am adamantly opposed to any logging of the existant old growth forest as well as other forests included in this plan. The forests are a tiny fragment of what God gave to us in the Pacific NW and should be protected for future generations.

These forests contribute to air and water quality, animal habitat, and the quality of human life - spiritual and recreational.

I am aware that the current plan excludes native peoples, which must be remedied! That said, I support Option A, meaning no changes to the current NW Forest Plan.

I support NO CHANGES to our existing Pacific Northwest Forest Plan.
