Comments: Greetings,

I am in support of protecting our old growth forests for future generations to enjoy, experience and to see.

I am support of extending the protection of old growth forests on public lands to the greatest number of years possible and increasing the protection for younger forests as well.

I understand that a balance needs to be reached between preservation and timber resources, and decisions will be made.

I ask that this committee's decision to be in favor of protecting old growth forests for this generation and generations to come.

With respect, thank you for your thoughtful consideration of this matter.

S.
