Comments: I want our forest lands preserved and protected, not logged except where necessary to maintain forest health. We need old growth forest, and there are so few left. Don't let the short sighted vision of a small minded politician detract all from the short, just, and long term benefits of retaining contiguous forest tracts if forest land. Humans and animals need this, we are the stewards and we need like management, and not extra profits for special interests.

We need forest service workers, too, stop this nonsense of firing good employees,
