First name: Ashley

Last name: Karitis

Organization:

Title:

Comments: Please only make amendments that would:

- 1) conserve old growth as it is a CRITICAL ecosystem
- 2) include indigenous perspectives and interests in this plan
- 3) officially recognize that old growth plays a critical role in mitigating climate warming
- 4) consult the best science on wildfire management

If private logging ventures can benefit from the above, fine, but not until the first 4 issues are met with strong legislature to stand on.
