Comments: Greetings,

I am concerned that the Forest Service's proposed amendment weakens protections for our older forests, clean water, and wildlife habitat.

Please do not log old growth forests or log in riparian areas/ adjacent to watersheds. Preserving biodiversity and habitat, protecting imperiled species, and protecting and restoring riparian areas and watersheds should be a core principle of this forest plan amendment.

Please consider further elevating indigenous and tribal voices especially as it pertains to traditional practices to mitigate wildfire and preserve native and sacred plants.

Prioritize outdoor recreation and tourism which contribute more jobs and money to the economy than logging.

Thank you for your time and consideration.
