Comments: Let the trees live!

Let the trees grow old ... older! Let there be MORE, not less old-growth habitat which is already in short supply because of man's endless over-harvesting.

With modern alternatives to using old-growth woods, there is no need to continue harvesting this precious, limited resource.

Let the trees live!

Is it true that as long as a tree is left that could bring a profit, a reason will be found to cut it down?

I see this playing out in alternatives B, C, and D.

Decision-makers, please stay the course that has been thoughtfully set to increase, not diminish, old growth forests. Choose ALTERNATIVE A.
