Comments: I would like the strongest protection for the forests with 100+ year old trees. I want extensive surveys conducted for the endangered species that live in all of our forests. I am not in favor of exclusions from any environmental laws weather they are called catagorical or not. I want no secrecy when it comes to excluding the public from knowing what the BLM, USFS, US Fish & Wildlife & National Marine Fisheries are subsidizing on our land and water. Logging, Mining, Grazing, Drilling and road building has damaged our land, oceans, and fisheries and the land needs to be restored. Thank you.
