Last name: Goulet

Organization:

Title:

Comments: It's a shame that tax paying Citizens not to mention veterans like myself who slept in ditches over seas defending this country are being forced off the land we defended. We are being treated the same as the American Indians were. Prove me wrong. As DOGE has been revealing there is more than enough money to help instead of paying for transgender operations in foreign countries or offer foreign countries sex changes. Show us that continuing to keep roads open while sharing the Beauty of this great Nation and supporting local business's in remote areas is a good thing. Alternative D is the most sensible option of them all. Our tax Dollars go to manage all our forest for all our benefits. To enjoy, harvesting for profit while managing from forest fires but most of all protect our lands without denying our use of them.
