Comments: Comment on NW Forest Plan Amendment - Support for Alternative D

Alternative D best balances the need of local communities, recreationists and industry professionals along with being a good steward of the environment.

Alternative D prioritizes active forest management which is essential for reducing wildfire risks, improving forest health and ensuring sustainable use of our natural resources.

Alternative D ensures that roads and trails remain open and offer the chance to off-road, camp, hike, hunt and fish in the most beautiful land around. It also affords the local businesses to be supported through gas stations, restaurants and lodging.

Alternative D is the best choice that encompasses forest health, economic stability, wild fire prevention and recreational access.

As a Native-American Indian I look forward to taking my grandkids off-roading, camping, hiking and hunting and fishing in the land of my ancestors.
