Last name: Haag

Organization:

Title:

Comments: I oppose any amendments to the current plan that allows or encourages the logging of mature/old growth stands, the clear cutting of any stands, the degradation of natural habitats for protected species, the degradation of watersheds, or the sale of any land covered by the current program. I support judicious forest management for the purposes of limiting wildfire risk through the implementation of indigenous tribal methodologies and the use of Federal forest lands by recognized tribes for the preservation of tribal cultural heritage.
