Comments: This amendment is the continuing betrayal of our government that should be looking out for us. This creeping on our public lands won't end until there's nothing left. Please stop this from happening at all. These national parks are vital in allowing a quality of life for us who can not afford luxury hotels and trips abroad. So many of us rely on these spaces for reprieve when we hardly have anything at all. How are we supposed to know our taxes are working for us when this actively working against us?
