Title:

Comments: * Protect mature and old-growth forests - don't raise logging limits to 120-150 years.

* Save wildlife like the Northern Spotted Owl and Marbled Murrelet.

* Intact forests fight climate change and reduce wildfire risk - cutting them down does the opposite.

* Support Tribal stewardship - but don't tie it to logging increases.

* Value recreation, clean water and fish habitat over timber profits.

I was a wildland fire fighter for 3 years, seeing first hand the resilience of old growth forests compared to how extremely susceptible

reprod units that had been logged and replanted where to wild fire. It's breaks my heart to see how little value natural resources, this short term drive to long for industry will destroy the paces that make America so incredible. Our public land is priceless and we need to protect it at all costs.
