Title:

Comments: Thank you for taking the time to read and consider the NW forest plan. Please make your decisions with the knowledge that what you decide will impact these forests for hundreds if not thousands of years. Please consider your children, grandchildren and their grandchildren and if you want them to benefit from the healthy air, green spaces and birds that forests provide. Please consider the communities that live near these forests now and how they rely on tourism and benefit from having mature forests near them. Please consider that old growth forests reduce the risk of extreme wildfire and clean the air for all of us who live in Oregon and the NW region. Please do the right thing and protect these forests.
