Comments: Hello, I'm writing to strongly voice my opposition to Northwest Forest Plan Amendment 64745. These forests, and our other public lands, are one of the most important shared resources in our country and to allow their destruction is short sighted, spiteful, and shows contempt for the people of this world.

These forests serve as critical habitat for threatened species, as massive carbon sinks, as filters for our drinking water, and as recreation for everyone in this world.

Please, I beg you, protect these forests from logging, and let them serve forever as a gift for generations to come.
