Comments: Please, PLEASE protect our old growth forests by NOT raising logging limits to 120-150 years. Cutting down these forests will threaten wildlife like the Northern spotted owls and Marbled Murrelet. Keeping these forests will fight climate change and reduce wildfire risk - cutting them down does the opposite!! We need to support Tribal stewardship but don't tie it to logging increases. Please I'm begging you to value recreation, clean water, fish habitat and the overall health of our state over timber profits.
