Title:

Comments: The premises behind the examination of amendments was flawed. The described action alternatives will increase the threat to endangered species, while offering no additional benefit in such areas as fire suppression or community economies. More logging of mature forests will threaten, not protect, old-growth forests. The only appropriate step is to end the analysis of any alternatives now; abandon the general amendment process, and allow the individual Districts to implement appropriate, scientifically based management programs to achieve the goals of the NWFP.
