Comments: Hi, I'm an Oregonian. I'm worried that the president's directives will push the Forest Service to pursue a more timber-friendly amendment to the Northwest Forest Plan, particularly if the agency is acting under Trump's order to circumvent endangered species assessments ahead of timber sales. I'm writing to express my concern and importance of endangered species assessments and strong science-based protection. Nothing is more valuable than the health of our people and natural environment. Thank you.
