Comments: Dear Forest Managers,

The Siuslaw National Forest deserves to be protected. Our unique climate creates a fire resistant canopy when it is left intact. These large forests hold and create water. They are priceless. Do not allow logging corporations to destroy my children's and grandchildren's birthright to clean air and water.

The ecosystems of the Siuslaw National Forest deserve protection. Salmon need cold, silt free water for their abundance. Do not allow logging to ruin these precious resources.

Loggers have already clear cut thousands of acres of publicly owned forests. They also have private tree farms they can harvest. Keep them out of our national forests. Do not give logging corporations access to the Siuslaw National Forest.

Sincerely,

Susan Murbach
