Title:

Comments: Intact forests fight climate change and reduces wildfire risk - as well as protect biodiversity necessary for resilient environments.

- Protect mature and old-growth forests and don't raise the logging limit to 100-150 years.
- Save wildlife habitat for animals like the Northern Spotted Owl and Marbled Murrelet.
- Support Tribal stewardship - but don't tie it to logging increases.
- Value recreation, clean water, and fish habitat over timber profiles.
