Comments: Northwest Forest Plan - considering 4 options

I live about a mile from the Siuslaw National Forest, on the Oregon coast.

I moved here for the beauty of the forest and the sea.

Alternative C is the best choice, as it includes more restrictions on harvesting & post-fire salvaging. This plan encourages natural regeneration, greater protection for wildlife and the natural habitat. Additionally, this option provides for increased water retention, carbon capture, wildlife corridors, and our forest's ecosystem.

A second choice would be Alternative A, leaving current requirements in place.

Sincerely,  
Catherine
