Title:

Comments: Why were Tribes not included in the 1994 NWFP. How does the Memo of Understanding Regarding Interagency Coordination and Collaboration for the Protection of Tribal Treaty Rights come into play in this Plan? And given the administration change, is it still valid?

Where is information on the 2023 Forest Service Tribal Access Plan located. How does it relate general trust responsibilities and what are those responsibilities? What are the Tribal rights beyond those specified by Treaty and how might they conflict with non Tribal American citizens access and usage of the Forest?

I am happy to see the co-stewardship use of incorporating Indigenous Knowledge in managing the forests, especially with respect to wild fire mitigation. What are the responsibilities of the co-stewardship with the Tribes. I ask as forest service land belongs to United States rather than the Tribes and as such, authority is with the Federal Government rather than the Tribes and therefore I wish to know what is being delegated.

Why were motorized access experts not included in the makeup of the Federal Advisory Committee (FAC)? It is my understanding motorized access was deferred to be addressed at a later date. Why is that?

Why were Tribes given preferential participation to the plan development prior to the FAC? Where is the data from the Tribal round tables and how much weight was it given?
