Title:

Comments: Hello,

I would like to bring attention to my support of the points listed below:

- * Protect mature and old-growth forests - don't raise logging limits to 120-150 years.
- * Save wildlife like the Northern Spotted Owl and Marbled Murrelet.
- * Intact forests fight climate change and reduce wildfire risk - cutting them down does the opposite.
- * Support Tribal stewardship - but don't tie it to logging increases.
- * Value recreation, clean water and fish habitat over timber profits.

Do not take away my and my fellow residents of the Pacific Northwest's right to a clean and healthy environment. We intrinsically deserve the right to have access to well cared for and protected natural land. What is the point of living and being alive if we have those rights stripped away? We may as well not have ever existed at all. Do not steal our joy that we experience as a community when we come together to rejoice in our beautiful natural world. It would be an utter horror and tragedy to strip us of the core elements that make our home worth living in. Do not make us wish we'd rather be dead than suffer in a world where nothing but disgusting greed exists. I hope that you can see far in the future and determine that these things are worth everything to protect. If you sacrifice these things now, there will be no one and nothing left to make a profit off of.

I hope for your deepest consideration in the review of your project proposal. I appreciate your time and effort in reviewing the commentary of the public.

Thank you.

~A concerned resident of the PNW
