Comments: Siuslaw National Forest native forest is crucial to mitigating climate change and offering people the calm that nature lends. I cherish the forests in this country, and remember vividly my trips to the western forests as a young adult. They are lush and teeming with life, and inspire hope and bring comfort to those who visit them. These lands are also cherished by the indigenous population and are rightfully theirs to be managed, that fact cannot be ignored.

DEIS must address points 1, 5, 6, 9, 11, 12 and 14 from Comments-A put forth by the Coast Range Association. I endorse the Coast Range Association's (CRA) comments on the DEIS. Please fully consider the CRA's comments.
