Comments: Please do not weaken the Northwest Forest Plan's protection of our shared forests with this amendment. Now, more than ever, we need stewards to protect our forests. We do NOT need more logging, despite what any corporate-paid, so-called expert says about it. Deforestation has cost us so much already. Further destruction of our mature and old growth forests will cause irreparable harm to wildlife, our various ecosystems, and will also leave Oregon residents stripped of the beautiful, air-purifying wonders that make our SHARED home the Pacific Wonderland. Please oppose this amendment and continue to protect the Northwest Forest Plan.
