Comments: I am commenting to urge you, as a taxpaying citizen, not to raise the acceptable logging tree age to 120 to 150 years. Our planet and every living species on it., INCLUDING HUMANS, depends on the diversity that trees of every age give to natural spaces. Expanding acceptable ages of trees that are able to be logged will promote forest fires and habitat loss for species integral to forest health. Please do not contribute to even more burning forests. I do not approve of North West Forest Plan Amendment #64745. Thank you for reading!
