Comments: Thank you for allowing my comments. I've read the proposed fire plan but find the wording used to lack specifics. I doubt what I think you're proposing is actually what you're planning.

What I feel to be helpful on all Federal and State forestlands :

- Cut and maintain all fire roads.

- Cut and maintain fire breaks where necessary.

- Selective harvesting of timber to maintain forest health.

Prescribed burning is a band-aid and allowing the forests to continue to burn every year destroys the natural habitat and endangers the health of all of us.
