Comments: All options besides Forest Plan A (keeping the current Forest Plan) go against all moral and ecological ethics of this area and the beings that reside in, near and around the forest. I absolutely do not condone any increase in Timber sales and would be HIGHLY disappointed in any officials and neighbors that do. In our darkest hours, we will turn to each other and realize we cannot breathe nor eat money. The forest is a finite resource and should be treated as such. Current logging is already excessive. Think outside your wallets.
