Comments: Allowing the federal government to "exploit" our precious public lands, parks, and irreplaceable forests is the worst idea imaginable. This will exponentially expedite climate change, greatly increase the risk of devastating wildfires (Paradise, CA) being a particularly raw and potent example of what happens to towns/cities bordering clear cuts. Please, whoever is reading this, do NOT allow this to happen. Our forests and their well being are vital for human flourishing, healthy watersheds, balanced wildlife. Please, whoever is reading this, do all you can to stop the devastation of our country's wild lands, places of refuge for countless wild creatures and solace for countless humans.
