First name: George

Last name: A Bloom

Organization:

Title:

Comments: I am greatly concerned that the UF Forest Service is now considering changes which would be very detrimental to and allow permanent damage to our forests. The land that I live on is populated by species of trees, underbrush and vegetation names of which too numerous to list in this, my assertion. Be that as it may, as a 94 year old man, living among and within this natural beauty, I urge you to preserve my forest and allow me to continue enjoying not only the beauty it provides, but also the unquestioned benefits of the watershed, future forest growth, shade to cool the earth, animals living within, the effect on the environment, but also for future generations to come.

George A Bloom
