Title:

Comments: As a resident of Oregon for 20 years and an avid outdoor enthusiast and birder, I do not want our old growth forest logged. Things I think are important are as follows:

No trees over 80 years old should be removed from "moist" OR "dry" climates

Clear guidelines need to be set, not left to the discretion of the local ranger

Need to implement regulations that prohibit private leasing of public lands

prohibit local government management of public lands, that would result in a broken mosaic of forest management practices that would impede ecosystems across watersheds and undermine processes for avoiding cumulative impacts...

Avoid compromising habitat resulting in a taking under USFWS terms

Carbon sequestration loss due to potential increased logging of previously protected areas

Disguised as fire and fuel reduction, but is in fact logging that will lead to more intense fires and destruction.

Thank you very much- jenn levo
