First name: Anna

Last name: Cruz

Organization:

Title:

Comments: My name is Anna Cruz and I am a lifelong Oregonian. I spent my youth in Portland and last 27 years on the Southern Oregon Coast. I made a choice to build my life , raise my family to be as close to all the things I love about this state , clean air, clean rivers and oceans and wild public spaces . I am also a realtor and can attest to the reason most buyers are drawn to this place are the same as the above.

I fear any changes to the NW forest plan that will negatively impact these vitally important components of what makes this an incredible place to live. Short sighted plans for a quick buck by logging off old growth trees will devastate quality of life for all of us who make this place our home . Commercial fishing , agriculture, tourism, wildlife, wildfire safety will all suffer under a policy of massive clear cuts.

Please consider these things before supporting policies that will have immediate negative impacts as well as hurt generations to come.
