Title:

Comments: The beautiful old growth forests and the animals here are what makes the Pacific Northwest what it is. It is not only our identity it is also so important for the air we breathe, the biodiversity, and protection to the native plants and animals in the area. Please please please don't weaken the Northwest Forest Plan. It saddens me to see this is even a possibility of happening and that greed and money is more important than our climate.

Sincerely,

Aliya Smyth
