Comments: To whom it may concern,

I am against the East Valley Fuels reduction project. Thinning out these areas will actually allow them to dry out quicker with more sunlight. This will increase the rate wildfires spread. This project would also displace wildlife, disturb many recreation areas, and be an eyesore from the Valley. None of these fuel reduction projects ever get cleaned up and weeds are typically the only thing that flourishes when the project is complete. Please do not move ahead with this project.
